No-Prep Therapy Activity: Sunshine Speech

by Mary Lowery, M.S., CCC-SLP

Your students will take a shine to this sunny game! Use this no-prep activity to target language (asking and answering questions, basic concepts, vocabulary, etc.), articulation, fluency, and pragmatics (emotions, turn-taking, participating in a game, etc.). Expansion questions are provided on the visual cue page. Rain or shine, this activity will make planning for your speech and language groups a breeze!

Number of Players

- 2 or more

Materials Needed

- *Guess My Sunshine* game page (one copy for each player or team)
- Pencils or crayons
- Bingo Chips (optional)
- Laminate game pages and use dry erase markers during game play (optional)

Object of the Game

Guess your opponent's sunshine by asking "yes" or "no" questions about its characteristics.

Directions

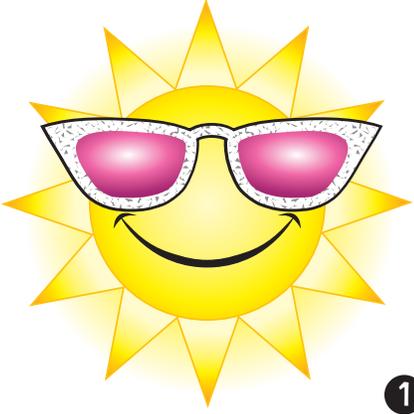

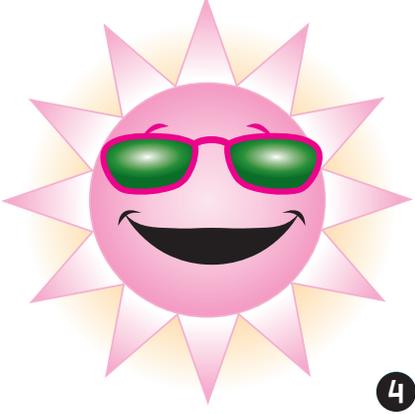

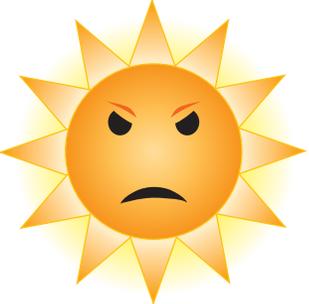

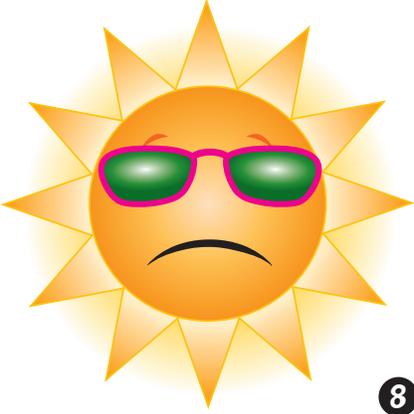

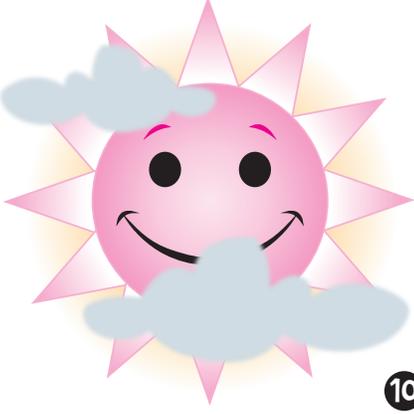

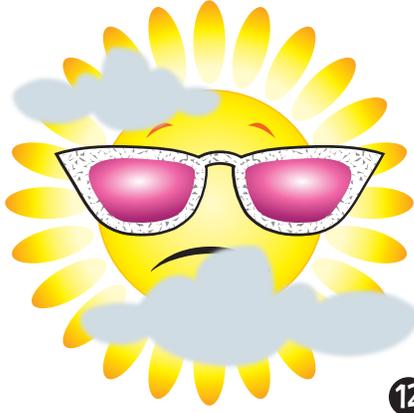

- Provide each player with a copy of the game found on the next page. 
- Each player selects a sunshine that his/her opponent will be attempting to guess
- Begin by asking your opponent a "yes" or "no" question about his/her chosen sunshine 
 - o **Example:** You might ask, "Is your sunshine yellow?" If your opponent answers "yes," eliminate all pictures that do not have a yellow sunshine by crossing them out or covering them with a bingo chip. If your opponent answers "no," cross out or cover all the yellow sunshine pictures. 
- Take turns asking questions to try to guess your opponent's sunshine. When you feel confident you can guess your opponent's sunshine, do so during your turn.

Tips for Game Play

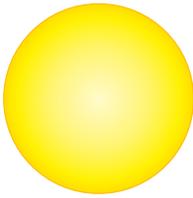

- It is helpful for the adult to record the number of the picture chosen for each player and keep the answer safe until the end of the game.
- For groups of players larger than two:
 - o Divide into teams of two.
 - o Designate one player to answer questions and the remaining player to ask the questions. The player who guesses the picture correctly then becomes the player answering questions.
- Use the visual cues found on the following page to help players struggling to identify, label, and describe attributes.
